

**In The Claims:**

The listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1-19. (Canceled).

20. (previously presented) A disk-anchoring device of an optical disk device, comprising:

a substrate;

a clamper frame for holding a clamper, pivoted on said substrate and having a first protrusion portion; and

a sliding element, movably mounted on said substrate and having an inclined portion and a second protrusion portion;

wherein, when said sliding element is moved on said substrate, said first protrusion portion is relatively moved along an inclined surface of said inclined portion so as to swing said clamper frame;

wherein, after a disk is loaded into the optical disk device, said second protrusion portion abuts and pushes said first protrusion portion.

21. (Previously presented) The disk-anchoring device as claimed in claim 20, wherein said clamper has a magnetic element.

22. (Previously presented) The disk-anchoring device as claimed in claim 20, further comprising an elastic element disposed on said substrate and providing a force on said clamper frame.

23. (Previously presented) The disk-anchoring device as claimed in claim 20, wherein said clamper frame has a clamping flange, and said clamper is mounted on said clamping flange.

24. (Canceled)

25. (Previously presented) The disk-anchoring portion as claimed in claim 20, wherein said sliding element further has a third protrusion portion, and before a disk is loaded into the optical disk device, said third protrusion portion contacts and supports said first protrusion portion.
